

# Assignment 1: Words

Author Name

October 30, 2019

## 1 Introduction

This is an example file of how your submissions should be formatted. You can either use  $\text{\LaTeX}$  with the *cluu* class to typeset your submission (recommended) or any other editing device, as long as the submission is as similar as possible to this example file we gave you. In this file the option *wide* is used with *cluu* to get extra wide lines, so the source begins

```
\documentclass[wide]{cluu}
```

## 2 $\text{\LaTeX}$

Typesetting texts in  $\text{\LaTeX}$  is common practice in academic writing. During the NLP-course you have the chance to develop routine to write and submit your textual assignments in  $\text{\LaTeX}$ . You may use the source file `NLP-submission.tex` located in `/local/course/nlp/basic1` and edit it accordingly.

## 3 Other

If you decide not to typeset your submissions in  $\text{\LaTeX}$ , please make sure they look similar to this example file. Particularly, please pay attention to the margins and the font size. After having edited your submission, please make sure to transform it to `PDF` format before submission. We will not accept any other format.
